What are collapsible portable secondary containment models?

These collapsible portable secondary containment models are for the containment of GEN sets, truck, generator, equipment, transformer, tank, tanker, tote, drum, or any type of primary containment or application where spills can occur. 2' x 2' to 50' x 125' sizes and in a number of containment wall heights.

What is a floating oil storage tank & barge?

The Lamor Floating oil storage tanks and barges fulfill the basic need to temporarily store recovered oil on site, whether it would be on land or sea. The durable floating storage tanks are highly flexible for storing recovered oil in remote locations and environments.

What are Portable containment pads?

The portable containment pads are made from industrial fabric so they may be quickly unfolded and deployed. Drive Through Truck and Tanker Models include secondary containment berms with exit and entry walls so that a HEMTT fuel truck or tanker may drive in and out without having to manually lower the walls.
