Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate--improving profitability and supporting sustainability goals.

How important are ancillary services to energy storage?

Ancillary services that stabilize the power grid typically represent 50 to 80 percent of the full storage revenue stack of energy storage assets deployed today. This is observed across multiple mature storage markets but is expected to decrease to less than 40 percent by 2030.

Energy storage power stations generate income through multiple revenue streams, including: 1) participation in ancillary services ...

Case studies based on the actual data of the Jinyun water-photovoltaic renewable energy aggregation station with energy storage equipment in Lishui City of China are ...

The new energy station is equipped with energy storage projects with a capacity of 20% and a duration of 2 hours, its initial investment will increase by about 15%.

Energy storage power stations generate income through multiple revenue streams, including: 1) participation in ancillary services markets, 2) energy arbitrage opportunities, and ...

The exploration of earnings for energy storage power stations reveals a multifaceted revenue landscape. Their ability to participate in ancillary services, capacity ...
