Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including cellular-like mechanisms.

Recent revelations concerning Chinese-manufactured solar power inverters have raised significant security concerns following the discovery of potentially harmful ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say ...

Recent investigations have uncovered the presence of undocumented communication devices within Chinese-manufactured solar power inverters and batteries, ...
