Is Belarus a good energy source?

Most energy in Belarus is cheap fossil gas from Russia, and Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world.

How much energy does Belarus use?

Primary energy use in Belarus was 327 TWh or 34 TWh per million persons in 2008. Primary energy use per capita in Belarus in 2009 (34 MWh) was slightly more than in Portugal (26 MWh) and about half of the use in Belgium (64 MWh) or Sweden (62 MWh). Electricity consumed in 2021 was 32.67 billion kWh, 3,547 kWh per capita.

Is Belarus a big oil refiner?

Belarus is a large oil refiner, listed 36th in the world, at 19 Mt of oil products in 2018 by the IEA. It has two refineries and oil pipelines built during the Soviet era including the Mozyr Oil Refinery. Oil consumed in 2021 amounted to 49.13m barrels with 12.52 m barrels produced, the rest imported.

With renewable energy adoption rising globally, Belarusian energy storage power stations are gaining traction for their role in grid stability and revenue generation.

The country is one of the world's largest importers of natural gas with estimates for 2018 being about 17 Mtoe (20 billion cubic metres [bcm]) of natural gas, making it the leading importer among the so-called EU4 Energy countries: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. In 2018 almost all generated electricity came from natural gas (97%, or 39 terawatt hours [TWh]). In 1990, the IEA reported natural gas ...

Historical Data and Forecast of Belarus Power Equipment Market Revenues & Volume By Utility for the Period 2020- 2030 Belarus Power Equipment Import Export Trade Statistics
