---

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The system was developed to meet the growing energy requirements of Slovenian enterprises. With its large 480kWh capacity, the C& I BESS ensures sufficient energy storage ...

In October 2020, the Slovenian energy solutions company NGEN launched the largest battery storage system (BESS) in Slovenia and the region at the Talum facility in Kidričevo, north-east ...

Slovenia is steadily accelerating its transition toward decentralized renewable energy, with solar power and battery energy storage systems (BESS) playing an increasingly ...

Developer NGEN is deploying the largest battery energy storage systems (BESS) in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too, CEO and co ...

The plans were revealed in its 2023 annual report released last month, which also spelt out its broader energy investment goals. By 2035, ...

The plans were revealed in its 2023 annual report released last month, which also spelt out its broader energy investment goals. By 2035, it aims to deploy 1,400MW of solar ...

The strategy includes co-locating BESS with solar and PHES projects, using the EU's Just Transition Fund and state aid for financing. Currently, the BESS market is led by ...

June 15, 2023: The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage ...

Developer NGEN is deploying the largest battery energy storage systems (BESS) in Slovenia, Austria and Croatia, and wants to ...

June 15, 2023: The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia.

This article explores how Slovenia's unique energy landscape benefits from advanced storage technologies, supported by real-world data and actionable insights for businesses.
