There has been a surge in the introduction of wind and solar power, especially small-scale, distributed generation projects, mainly solar photovoltaic, which reached an installed capacity ...

The methodology will still be disclosed, but it is expected to be a combination between the lowest fixed price offered and the Remaining Capacity of the SIN for Generation Flow at the project's ...

Brazil launches a 2026 energy storage auction to boost large-scale battery projects and define storage's role in its evolving power market.

The Brazil Battery Energy Storage For Wind & Solar Hybrid Project Market is expected to witness sustained global growth driven by innovation, digitization, and emerging ...

The Brazilian electricity sector is experiencing a paradox: while the need for flexibility in the grid is growing - pressured by the ...

Brazil's Energy Storage Association (ABSAE) predicts that the country's energy storage capacity will reach 25 GW by 2030, attracting \$8.46 billion in investment. In 2025, ...

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage ...

But hold onto your caipirinhas--this South American giant is fast becoming a hotspot for new energy storage projects. With abundant sunlight, ambitious climate goals, and ...
