-----

Colombia's BESS tender in 2021, won by Canadian Solar, was a good step forward, but there is still no ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Colombia's BESS tender in 2021, won by Canadian Solar, was a good step forward, but there is still no clear regulation on how stand-alone BESS will be compensated. ...

The AC-coupled BESS comprises a 20-foot shipping container unit with 120 battery packs totalling 2MWh of energy storage capacity with ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The AC-coupled BESS comprises a 20-foot shipping container unit with 120 battery packs totalling 2MWh of energy storage capacity with a power rating of 1MW. The LFP cells ...

This article explores how cutting-edge storage technologies address Colombia's unique energy challenges while creating opportunities for businesses and communities.

The new regulations pave the way for energy arbitrage - the practice of storing electricity from the grid or from solar and wind farms when prices are low and releasing it when ...

Government subsidy for mobile solar container systems emerges as the ultimate bridge - but how exactly does this program work? And why should businesses act before December 2025?

Let's face it - when you think of Colombia, energy storage containers might not be the first thing that comes to mind. But here's the kicker: this South American gem is quietly ...

As Colombia accelerates its transition to renewable energy, containerized energy storage systems are emerging as game-changers. This article explores how Bogotá's Energy Storage Station ...

Located in the city of Barranquilla in northern Colombia, this project will consist of a 45 MWh lithium-ion battery energy storage system and is expected to reach commercial ...
