---

Something that is concentrated in a specified place is mainly found in that place.

Molten salts (MSs) thermal energy storage (TES) enables dispatchable solar energy in concentrated solar power (CSP) solar tower plants. CSP plants with TES can store ...

NLR is defining the next generation of concentrating solar power (CSP) plants through integration of thermal energy storage ...

A concentrated liquid has been increased in strength by having water removed from it. Sweeten dishes sparingly with honey, or concentrated apple or pear juice.

As a thermal energy generating power station, CSP has more in common with thermal power stations such as coal, gas, or geothermal.

While PV is more cost-effective and efficient than CSP plants [6], CSP can supply supplementary energy and provide dispatchable power on-demand by using the heat stored in ...

SETO funding for CSP research is awarded to projects that substantially advance, develop, or engineer new concepts in ...

Concentrated solar power uses large arrays of mirrors or lenses to concentrate sunlight onto a small fixed point. The heat from this fixed point is then transferred to a conventional steam ...

to (cause to) become more intense, as by removing or reducing the amount of liquid: [no object] The gravy thickened and concentrated in the microwave. [~ + object] Concentrate the gravy by ...

NLR is defining the next generation of concentrating solar power (CSP) plants through integration of thermal energy storage technologies that enhance system capacity, ...

The meaning of CONCENTRATED is rich in respect to a particular or essential element : made less dilute or diffuse. How to use concentrated in a sentence.

In a concentrating solar power (CSP) system, the sun's rays are reflected onto a receiver, which creates heat that is used to generate electricity that can be used immediately or stored for later ...
