How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

Can a battery energy storage system solve grid challenges?

Fortunately, a solution is emerging: battery energy storage systems (BESS). Global examples show BESS can address diverse grid challenges. Countries from China to Australia to the United Kingdom are building large-scale BESS to balance variable renewables generation and maintain resource adequacy.

How India is promoting the adoption of energy storage systems?

India has begun to invest in energy storage and develop policy to support the development of battery storage. The Ministry of Power in India has taken a significant step in promoting the adoption of energy storage systems (ESS) by introducing an Energy Storage Obligation (ESO) alongside the Renewable Purchase Obligation (RPO).

Is Indigrid a regulated utility scale battery storage project?

IndiGrid's 20MW/40MWh Battery Storage Project: IndiGrid continues provide value by being the first commercial regulated utility scale battery storage project in Delhi (these are designed so no more power is needed from the grid), highlighting that utility scale battery storage is possible.

In recent auctions, BESS tenders in Maharashtra (August 2024, 300 megawatts (MW)) and Rajasthan (November 2024, 500MW) secured monthly tariffs as low as Rs219,001 ...

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched ...

auction for 500 MW/1000 MWh ...

maintaining its position as the cheapest form - in terms of \$/kWh - of grid-scale energy storage. Of all countries here compared, costs are cheapest in India, which already ...

Using scenario-based capacity expansion modeling to assess how much energy storage can be cost effectively deployed in India through 2050, the study finds that energy storage becomes ...

The Institute for Energy Economics and Financial Analysis (IEEFA) estimates that the capital cost for a 1-MW/4-MWh standalone ...

India's energy transformation is entering its most disruptive phase. While solar tariffs made headlines a decade ago, a silent revolution is now underway in battery energy ...

The Institute for Energy Economics and Financial Analysis (IEEFA) estimates that the capital cost for a 1-MW/4-MWh standalone battery system in India was \$203/kWh in 2020, ...

Exhibit 2 shows the project economics for a typical BESS installation in India, comparing costs from the latest four tenders against estimated potential revenues. Under an ...

Despite a 65% decline in BESS costs, India's energy storage market struggles due to the absence of Power Sale Agreements (PSAs), leading to the cancellation of 11 GWh of ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total ...

Exhibit 2 shows the project economics for a typical BESS installation in India, comparing costs from the latest four tenders against ...
