-----

Croatia's Ministry of Environmental Protection and Green Transition has initiated the process to determine if a full environmental impact study is necessary for the proposed 99 MW ...

This article examines ATESS" pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, ...

Summary: Explore how Croatia is advancing its energy transition through innovative power generation and storage solutions. Learn about renewable integration, grid stability, and the ...

The next phase includes the installation of a battery energy storage system and a second solar power plant with an additional 40-megawatt capacity. Together, these ...

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an environmental impact assessment for the planned ...

This article examines ATESS" pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, highlighting key projects across various factories ...

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage

capacity and the deployment of a VPP platform, allowing real-time ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in ...

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tuksa, President of the Managing Board of Koncar - ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.
