The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and ...

The United States is positioned to create the robust domestic solar photovoltaic (PV) supply chain needed to support the Biden-Harris ...

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

Deployment takes only 3 hours, half the time required by traditional energy systems, which typically take 8-12 hours. In collapsed form, the container needs only 20m<sup>2</sup> of area, reducing ...

On-time delivery is one of the main challenges of all last-mile transportation efforts. From groceries to machinery, products headed to the end-user are usually expected on strict ...

Three strategies, actions, and recommendations are critical to U.S. success in building a robust solar supply chain: Enact legislation to provide tax incentives to support domestic ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

Customs delays: When shipping to countries such as Saudi Arabia, you need to get the local certification system, such as Saudi Arabia's SASO, in advance. If not, customs ...
