Who is building a power station in Equatorial Guinea?

The power station is under development by the Government of Equatorial Guinea, with funds borrowed from the Development Bank of Central African States (BDEAC). The engineering, procurement and construction (EPC) contractor for this project is Duglas Alliance, a Ukrainian multinational engineering and construction company.

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

How much does construction cost in Equatorial Guinea?

The construction budget is reported to be EUR467 million (US\$531 million). The cost was met by the government of Equatorial Guinea, with partial funding in form of a loan of EUR122 million (US\$137 million), provided by BDEAC. Construction began in 2012 and was expected to conclude in 2020.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

While the Turbogas plant has been Equatorial Guinea's largest power plant for over a decade, the Ministry of Mines and Hydrocarbons has been pushing to further develop the use of natural ...

Situated in the Río Muni region, this key project will significantly boost the country's electricity generation. Upon completion, it ...

The power station is located at the village of Sendje (Senye), across the Weller River, approximately 40 kilometres (25 mi) southeast of the city of Bata, on the country's mainland.
