From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by battery energy storage systems (BESS). Last year ...

The following resources provide information on a broad range of storage technologies.

Globally, energy storage deployment increased by 53% last year. As we look ahead to 2025, the North American energy storage sector is poised for another transformative ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

The U.S. energy storage market size crossed USD 106.7 billion in 2024 and is expected to grow at a CAGR of 29.1% from 2025 to 2034, driven by increased renewable energy integration and ...

A quick look at projections for energy storage development, including costs and types of long-duration technologies in demonstration.

US energy storage market added more than 2 GW across all segments in Q1 2025. Despite a q-o-q decrease in storage installations, Q1 2025 new additions are the highest ...

"The Q1 2025 results demonstrate the demand for energy storage in the US to serve a grid with both growing renewables and growing load. However, the industry stands at ...

Estimated demand for energy storage projects
