Where is Georgetown solar located?

Georgetown Solar Inc. is developing a 230-megawatt (MWac) solar project located 11 kilometres south of Carseland, Alberta in Vulcan County. The Project encompasses 700 acres (400 soccer fields) and has been sited on privately owned cultivated farmland.

What is the Georgetown project?

The Georgetown Project began development in 2020 with land securement and the initiation of environmental assessments. We are committed to sharing information about the Project and working with the local community to ensure that we receive and understand stakeholder feedback and concerns.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

What are the benefits of solar and energy storage?

Bulk storage: These grid-connected storage projects enable increased integration of renewable energy sources while ensuring a resilient and reliable power supply when and where it's needed most. Learn about the benefits of pairing solar and energy storage and incentives available for installing a system at your home.

Westbridge Renewable Energy Corporation announce that its wholly-owned subsidiary, Georgetown Solar Inc., has secured financing ...

From raw materials straight through to end-user applications, we capture and analyze the critical details that help professionals stay current and navigate the solar market.

The battery storage project is expected to have a long lead time, but its potential benefits are substantial. One of the primary advantages highlighted is the ability to integrate battery ...

Westbridge Energy Corporation is developing the Georgetown Solar Project under the name Georgetown
