We integrate tanks with security systems into our boxes.

Germany's largest oilfield is in the North Sea where the black gold is pumped up by the Mittelplate drilling platform. To create a better connection to the mainland of Schleswig-Holstein, an oil ...

OverviewProductionHistoryGeologyTechnical featuresOwnershipSafety and environmental protectionExternal linksStarting from October 1987, the field has been tapped in several sandstone layers at depths reaching 2,000-3,000 m (6,600-9,800 ft). The size of the deposit was adjusted upward to over 100 million tons, of which 15 million tons were extracted by June 2005. The annual production of Mittelplate Island amounts to 900,000 tons of oil (about 18,100 barrels of oil per day). Under pre...
