---

Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity ...

Global battery energy storage systems, or BESS, rose 40 GW in 2023, nearly doubling the total increase in capacity observed in the previous year, according to a special ...

Find the latest statistics and facts on energy storage.

BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% increase over 2024 and the highest ...

BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% ...

According to Rho Motion's BESS database as of February 2025, by 2027 the top 20 countries' deployed BESS grid capacity will have grown by at least 289% compared to ...

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. About USD 115 billion - the lion's share - was for ...

Last year, a record 200 GWh of new BESS projects came online globally, bringing the world's total operational battery storage ...

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. ...

This graphic, using exclusive data from Benchmark Mineral Intelligence, compares battery capacity by cathode type across major countries.

Deployed global capacity for the first half of 2025 culminates to 86.7 GWh of battery energy storage system (BESS) capacity, representing a year-on-year increase of 54%.

Last year, a record 200 GWh of new BESS projects came online globally, bringing the world's total operational battery storage capacity to 375 GWh. China maintained its leading ...
