Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Are solar & battery installations a threat to cybersecurity?

As solar and battery installations expand around the world, cybersecurity specialists call for a change in the way nations evaluate risks, even at the household level. The fear is no longer theoretical anymore. A reported remote shutdown of inverters emanating from China shook the industry in November 2024.

Recently, a powerful X-class solar flare erupted, causing shortwave radio blackouts over the Atlantic, South America, and Africa. This event highlights the potential risks that solar ...

Recently, a powerful X-class solar flare erupted, causing shortwave radio blackouts over the Atlantic, South America, and Africa. ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

One such innovation gaining rapid adoption is the solar power container. Solar power containers combine

solar photovoltaic (PV) systems, battery storage, inverters, and ...

The Solview460° Global Communications Damage Report highlights a significant disruption in worldwide communications systems, triggered by a recent surge in solar activity.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

The recent solar activities illustrated by the X2.7 flare, which impacted radio communications across five continents, underscore the need for comprehensive global ...

U.S. energy officials are quietly exploring a potentially major national security threat: unrecorded communication devices built into Chinese-made inverters and batteries that ...

U.S. energy officials are quietly exploring a potentially major national security threat: unrecorded communication devices built into ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

U.S. energy officials are on high alert after unidentified communication devices were discovered inside Chinese-manufactured equipment crucial to renewable energy ...
