This project plays a crucial role in Guinea's transition towards a more sustainable energy future. By leveraging advanced lithium battery ...

Two towns in Guinea, a country in West Africa which grapples with issues of energy security, are reaping the benefits of newly installed solar PV (photovoltaic) mini-grids backed with battery ...

Guinea plans to build the country's first solar power plants to increase its electricity production by 15% and cut its reliance on West ...

This new project will increase the reliability of the power system by storing solar energy during the day for use during evening peak hours. This will reduce the need for thermal ...

The two plants will make Guinea's energy system stronger, greener and more reliable, bringing an extremely affordable new energy source into a ...

The recent fire that burnt the EDG warehouse and destroyed 96,362 out of the 100,000 meters procured under the project has compromised the PDO. As a result of this fire, about 578,000 ...

This new project will increase the reliability of the power system by storing solar energy during the day for use during evening ...
