How many numbered storage units can be built in a base?

2.20 Synthesis - Slots increased, used to be 5. Containers can now be named. Each numbered storage unit can be built once per base & will access the same items as the same numbered storage built elsewhere. There are 50 slots in each container /unit & you can build 10 different ones.

What are the different types of base stations?

Some basic types of base stations are as follows: Macro-base stations are tall towers ranging from 50 to 200 feet in height, placed at strategic locations to provide maximum coverage in a given area. Those are equipped with large towers and antennas that transmit and receive radio signals from wireless devices.

What are the components of a base station?

Power Supply: The power source provides the electrical energy to base station elements. It often features auxiliary power supply mechanisms that guarantee operation in case of lost or interrupted electricity, during blackouts. **Baseband Processor:** The baseband processor is responsible for the processing of the digital signals.

What are the statistics of a container?

Every container has two key statistics: Standard Cargo Units (SCU) and Number of Ports. These define everything the game needs to know about loading a container onto a pallet or attaching it to a ship.
