How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does a solar battery cost in 2025?

While prices for solar batteries in 2025 range widely from around \$7,000 to \$15,000 installed, the long-term benefits can outweigh the initial expense. A battery allows you to store excess solar energy for nighttime use, reduce your reliance on the grid, and maintain power during outages.

How much does it cost to add a solar battery?

Adding a solar battery to an existing solar panel system typically doesn't cost much more than including it during a new installation. However, there may be additional retrofitting costs, such as resolving compatibility issues or upgrading your inverter to a battery-ready model.

How many kWh can a solar battery hold?

Solar battery storage capacity typically ranges from 3 kWh to 20 kWh, depending on the model and manufacturer. The higher the storage capacity, the more electricity the battery can hold for use during outages or after sunset. However, more storage comes with a higher price tag.

If you're considering adding a solar battery to your home, you're probably wondering: How much does a solar battery cost? The ...
