How much do solar batteries cost?

The guide below shares the best solar batteries and installation fees, plus their long-term savings potential. Solar batteries cost an average of \$10,000-\$19,000 in addition to installation costs. You may need multiple batteries to power your whole house with solar batteries.

How much does a solar battery cost in 2025?

While prices for solar batteries in 2025 range widely from around \$7,000 to \$15,000 installed, the long-term benefits can outweigh the initial expense. A battery allows you to store excess solar energy for nighttime use, reduce your reliance on the grid, and maintain power during outages.

Which battery is best for solar energy storage?

Lithium-ion batteries: The most common choice for residential solar energy storage, lithium-ion batteries were first developed for electric vehicles. They offer a competitive balance of cost, efficiency, and durability, lasting longer while being lighter and more compact than lead-acid alternatives.

Should you invest in a solar battery?

Investing in a solar battery can significantly add to the cost of your solar energy system. Solar batteries are valuable additions to solar systems, storing excess power for later use, maximizing your energy use, and cutting your electricity bills.
