Looking for an energy-efficient way to cool your home? Our guide to choosing the best solar air conditioner for you has everything you need to know.

In this blogpost we'll walk you through a new solution in Spain that's helping thousands of homeowners use air-conditioning without worrying about the running costs.

OverviewHistoryPhotovoltaic (PV) solar coolingGeothermal coolingSolar open-loop air conditioning using desiccantsPassive solar coolingSolar closed-loop absorption coolingSolar cooling systems utilizing concentrating collectors Solar air conditioning, or "solar-powered air conditioning", refers to any air conditioning (cooling) system that uses solar power. This can be done through passive solar design, solar thermal energy conversion, and photovoltaic conversion (sunlight to electricity). The U.S. Energy Independence and Security Act of 2007 created 2008 through 2012 funding for a new solar air conditioning research and development p...

Solar-powered ACs operate by harnessing energy from the sun and converting it into electricity. These ACs offer long-term savings by reducing electricity bills by up to 50 ...

Whether you're buying a beachfront apartment that benefits from natural sea breezes or a villa further inland where cooling is ...

Meet the low-energy, sustainable air conditioning that cools, heats, and dehumidifies your home or business beautifully, quietly, efficiently. Low energy, big savings: Inverter and heat-pump ...

In Spain, an air-to-air heat pump is a popular choice since it provides warmth in winter and cooling in summer. When combined with ...
