With its completion, the LASCO solar and battery storage project stands as a beacon of innovation and progress in Jamaica's renewable energy landscape.

Under the project and with USAID support, JERA worked to strengthen the resilience of Jamaica's energy sector by accelerating the uptake of distributed solar ...

The company is in the final approval stages for a project that will add 133 megawatts of solar power and 170 megawatts of battery ...

GSL Energy, a leading energy storage solutions provider, has successfully deployed three 14.34 kWh floor-to-floor lithium iron phosphate (LiFePO4) energy storage ...

Explore how battery energy storage systems are transforming Jamaica's power sector--cutting energy costs, reducing outages, and enabling renewable energy growth.

GSL Energy, a leading energy storage solutions provider, has successfully deployed three 14.34 kWh floor-to-floor lithium iron ...

The Jamaica Public Service Company (JPS) has committed US\$21 million (\$J2.6 billion) to the development of a 24.5-megawatt facility to store energy as a safeguard against power outages.

In pursuit of the renewable energy target, the Government implemented legislation, enabling Jamaica Public Service (JPS) customers with renewable energy generators to sell ...

In a groundbreaking development for Jamaica's renewable energy landscape, a joint initiative between LASCO, The University of the West Indies (UWI), and the USAID has ...

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month. ...

Remember that scene in James Bond's "Dr. No" where solar panels seemed futuristic? Jamaica's making that look antique. Their latest project combines floating solar arrays with existing hydro ...

The company is in the final approval stages for a project that will add 133 megawatts of solar power and 170 megawatts of battery storage to its energy portfolio over the ...
