One of their most popular offerings is a compact wastewater treatment unit designed for villages of 50-200 people. It combines simple sedimentation tanks with biological ...

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance in the context of renewable energy.

The South Tarawa Water Supply Project funded by Asian Development Bank, Green Climate Fund, World Bank and the Government of Kiribati is a US\$58 million project ...

A photovoltaic power plant will also be constructed to offset the GHG emissions from the desalination plant and the increased water treatment and distribution. The entire population of ...

F Cubed continues its impactful mission in Kiribati by delivering another container of systems, ensuring the ongoing provision of fresh drinking water to the island group.

Kiribati becomes more independent from external fuel imports, using local and renewable energy sources that are environmentally friendly, save and "for free"

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance ...

Our Aspiral containerized wastewater treatment solutions come in several configurations to treat from 20 to 350 m³/d (13,000-90,000 GPD) of municipal wastewater.

Containerized wastewater treatment plants represent a significant advancement in the field of wastewater
