Solar electricity generation includes solar photovoltaic and solar thermal generation, and distributed solar generation where available.

The Kiribati Integrated Energy Roadmap (KIER) report highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective.

The EKLIPSE project aims to sustainably improve power supply and access in the Line Islands with a focus on renewable energy (solar PV and BESS integrated with existing diesel ...

The project objective was to contribute to reducing Kiribati's dependence on imported petroleum for power generation in order to improve energy security and to reduce the GHG emissions ...

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy ...

Supported under the Pacific Environment Community (PEC) Fund, the solar PV installation is the first ever grid connected system for Kiribati that will enable the Public Utilities ...

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and ...

The "Electrification of Kiribati's Line Islands Powered through Solar Energy" (EKLIPSE) project, launched in
