In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

Looking to offer Laos a true alternative to hydroelectric power, I have put forward the idea of a 11,400 MW floating solar-with-storage system (FSS) on the 370 km² Nam Ngum reservoir - ...

Together with the Government of Laos, EDF signed a memorandum of understanding to undertake the feasibility studies for a Pumped Storage Hydropower project located nearby ...

With a total installed capacity of 600 MW, the project includes 133 wind turbines rated at 4.5 MW each, a booster station, and a 500 kV transmission line.

Located in the northern provinces of Oudomxay, Luang Namtha, and Phongsaly, the project is designed to create a comprehensive clean energy base integrating wind, solar, ...

As the first wind farm in Laos and the largest in Southeast Asia, Monsoon has set a new benchmark by securing a bankable cross ...

This latest agreement follows a 2022 supply and service deal worth USD 409 million between China Western Power and another Lao power company. Last year, Laos and ...

This latest agreement follows a 2022 supply and service deal worth USD 409 million between China Western Power and another Lao ...

Located in the northern provinces of Oudomxay, Luang Namtha, and Phongsaly, the project is designed to

create a ...

But here's the kicker: traditional power grids weren't built for solar's midday surges or wind's unpredictable gusts. Enter Vientiane's groundbreaking solution - a 50MW solar farm paired ...

With 80% of its electricity already coming from renewables (mostly hydropower), Laos is now betting big on energy storage solutions to juice up its regional influence. But how ...

With a total installed capacity of 600 MW, the project includes 133 wind turbines rated at 4.5 MW each, a booster station, and a 500 kV ...
