The Varme PV array, located in the western municipality of Kuldiga, features 156,000 solar panels across 110 hectares, which makes it one of the largest solar installations ...

Latvia has set ambitious climate goals, aiming to source 57% of its electricity from renewable resources by 2030, according to the International Energy Agency (IEA). However, ...

Latvia has set ambitious climate goals, aiming to source 57% of its electricity from renewable resources by 2030, according to the ...

These advanced panels capture sunlight from both sides, maximizing energy generation. Projected to produce 99 GWh of electricity ...

Lithuanian government-owned utility and renewables developer Ignitis Group has completed its first 94MW solar project in Latvia. The 110-hectare Varme solar plant includes ...

Operating under market conditions, it will supply green electricity to the local grid. The overall Stelpe project, which comprises two separate sites, marks one of the three large ...

These advanced panels capture sunlight from both sides, maximizing energy generation. Projected to produce 99 GWh of electricity annually, the farm will make a ...

In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 MW, while Latvia's stood at only 500 MW. The new ...

However, local governments, like in the capital Riga, are actively engaging in sustainable energy plans, promoting solar PV expansion. Various funding programs support rooftop solar PV ...

Construction work is currently underway. The total number of solar panels installed in these projects is around 389,000 and the solar farm will provide green energy to nearly ...

The Varme PV array, located in the western municipality of Kuldiga, features 156,000 solar panels across 110 hectares, which makes ...

The plant occupies 110 hectares and is equipped with 156,000 solar panels capable of generating energy to supply more than 40,000 households per year. This development ...
