Solar control glass is ideal for helping to maximize natural daylight while reflecting a high proportion of solar radiation away from the glass, contributing to keeping the indoor space ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Base-line commercial glass has a solar transmission of 83.7%. I.e. 16.3% of the sun's energy do not even get to the PV material. The energy loss is due - in equal parts - to reflection on the ...

Solar control low-e coatings are designed to limit solar heat gain by reflecting solar short-wave infrared energy. This functionality is crucial for keeping buildings cooler, especially in warmer ...

Laminated glass with PVB for safety and insulation. Insulated glass with chambers for thermal efficiency. 01.

Cardinal LoE glass is ideal for all weather conditions in most climates. In summer, its patented coating blocks around 85% of the sun's harmful ultraviolet rays and 60% of the sun's heat. It ...

Solar Reflecting Coating
How Is Solar Control Measured? Solar Heat Gain Or "G" Value
Light to Solar Heat Gain (Lshg) Or Selectivity
Insulated Glass Unit
Solar control performance is achieved through the use of a very thin, transparent, and permanent coating that helps limit the solar energy entering inside. It helps control solar gain to various levels depending on the coating while allowing natural daylight in and views on the outside. See more about how glass is coated. See more on guardianglass Pilkington
Solar Energy - Pilkington
The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar energy technologies, including thin film photovoltaics, crystalline silicon ...

The eco-friendly escape is powered by solar panels and a wind turbine--and it even includes a full bath.

Eco-friendly features like solar panels and rainwater catchments keep this retreat's ...

When you want windows that provide the ultimate in energy savings--with a clear glass view that lets the natural light in and reduces solar heat ...

Solar control low-e coatings are designed to limit solar heat gain by reflecting solar short-wave infrared energy. This functionality is crucial for keeping ...

The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar energy technologies, including thin film photovoltaics, crystalline silicon ...

When you want windows that provide the ultimate in energy savings--with a clear glass view that lets the natural light in and reduces solar heat gain--ask for Solarban® 70 glass by Vitro Glass.
