InnoChill introduced the TF210 Energy Storage Cooling Fluid, designed specifically to address the limitations of traditional air cooling.

Sodium-ion BESS with liquid cooling are designed with modular architecture. You can easily scale from hundreds of kWh to several MWh by adding standard racks and PCS/inverter units.

Thanks to Lingtech's liquid-cooling and smart temperature management, sodium-ion batteries maintain stable output even at -20 °C to 60 °C, greatly extending service life and safety ...

This system is a 125kWh Battery Energy Storage System using sodium-ion (NaCP 170Ah) cells with advanced liquid cooling. Designed for stationary commercial and industrial applications, it ...

GS-1.1 is the first commercially available sodium-ion battery energy storage system built for grid-scale deployment. Powered by NFPP chemistry, it operates without active cooling- a ...

Discover how liquid-cooled energy storage systems enhance performance, extend battery life, and support renewable energy integration.

Discover GSL Energy's advanced liquid cooling energy storage systems for commercial and industrial applications. Scalable to 5MWh, certified by UL, CE,CEI and IEC. Improve energy ...

Jiangsu Zhongtian Technology Co., Ltd. (ZTT) has recently unveiled its latest innovation--the ENERGRID NA7 liquid-cooled energy storage system with a storage capacity ...

SolarEast combines advanced sodium-ion cells with a highly reliable liquid cooling system, delivering a

Liquid-cooled sodium energy storage equipment
