-----

The Mauritanian government has signed an agreement with renewable energy company Ewa Green Energy for the construction of a ...

This project, the first of its kind in the country, will combine 160 MW of solar power with 60 MW of wind power. It will be operated for fifteen years under a public-private ...

Featuring an impressive 160 megawatts (MW) of solar power, 60 MW of wind energy, and a robust 370 megawatt-hours (MWh) battery storage, this project is not just a ...

This new IEA report - the first focusing on Mauritania - explores the potential benefits to Mauritania of developing its renewable energy options and includes an analysis of ...

In a significant step towards energy transition, Mauritania signed a public-private partnership agreement worth \$300 million on Friday, September 12, in Nouakchott to construct ...

The Mauritanian government has signed an agreement with renewable energy company Ewa Green Energy for the construction of a \$300 million hybrid power plant ...

This new IEA report - the first focusing on Mauritania - explores the potential benefits to Mauritania of developing its renewable ...

This commercial-scale facility will use dedicated off-grid wind and solar power to produce green hydrogen and ammonia, with an initial goal of 355,000 tons of renewable ...
