---

A 17.5 MW floating solar project with a 12 MW Battery Energy Storage System (BESS) at Tamarind Falls, developed in partnership with the National Thermal Power ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of ...

The government of Mauritius has welcomed the commissioning of a 20MW battery storage project which will provide frequency regulation to the East African island nation's grid.

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible within reasonable costs. Solar photovoltaic (PV) and battery energy ...

With integrated battery storage, the facilities are expected to deliver a consistent energy output for at least 12 hours a day, mitigating ...

The Henrietta project is a cornerstone of the nation's energy transition, combining a 60 MWp solar photovoltaic (PV) array with a substantial 240 MWh battery energy storage ...

In an exciting development for renewable energy in Africa, Qair, an Independent Power Producer (IPP), has successfully closed a loan to finance a significant 60MW hybrid ...

Mauritius isn't just stacking batteries like Lego bricks. Their new energy storage base combines three cutting-edge solutions: Remember those old Nissan Leaf batteries? ...

With integrated battery storage, the facilities are expected to deliver a consistent energy output for at least 12 hours a day, mitigating the intermittency challenges associated ...

The CEB is committed to further expanding its BESS capacity to meet growing energy demands and support the integration of renewable energy. These efforts are part of a broader strategy ...
