Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that ...

Mexico's president Andres Manuel Lopez Obrador, popularly known as AMLO, on Friday inaugurated the first phase of the Puerto Penasco solar-plus-storage power plant in the ...

The Ministry of Environment and Natural Resources (Semarnat) last week conditionally authorised the construction of a ...

The first phase of the Project has an installed solar power capacity of 120 MW, and is equipped with a 12 MW/24 MWh lithium iron phosphate (LFP) battery energy storage system, which is ...

This is the first government-level photovoltaic + energy storage project in Mexico. We collaborated with CFE (Mexican Federal Electricity ...

Mexican President Andres Manuel Lopez Obrador (AMLO) inaugurated the first phase of the Puerto Penasco solar-plus-storage power plant in the Mexican state of Sonora, ...

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost. Since solar power is not available during the night, and because wind power tends to be complementary to solar, a mix of both can be expected. Both require substantial storage

October decree that sets clearer rules for private energy investments.

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Concentrated solar power prospects for southwest United States and northern Mexico Installed Capacity of total distributed clean energy in Mexico. The blue line represents current growth in ...

This is the first government-level photovoltaic + energy storage project in Mexico. We collaborated with CFE (Mexican Federal Electricity Commission) to design and supply the BESS (Battery ...

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government ...
