All the cell phones within a cell communicate with the system through that cell's antenna, on separate frequency channels assigned by the base station from a common pool of frequencies ...

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. They are ...

This paper study enhances the efficiency of mobile cellular networks by evaluating the cellular base station networks' topology mathematically by newly prepared topological indices.

Many mobile base stations in the equipment put into operation early, often damp, high temperature, dust, etc., therefore require communication power with moisture, high ...

Such stringent requirements can be met by power supplies built using the latest semiconductor technologies combined with leading-edge circuit topologies and advanced packaging techniques.

We analyze the problem of neighborhood selection for the optimization, to define what part of the networks needs to be reconfigured when new base station is added.

First, each base station establishes the wireless channel for a subscriber's UE upon power-up or upon handover when the UE is active. This channel ...

All the cell phones within a cell communicate with the system through that cell's antenna, on separate frequency channels assigned by the base ...

Recognizing this, Mobile Network Operators are actively prioritizing EE for both network maintenance and environmental stewardship in future cellular networks. The paper aims to ...

Mobile cellular networks consist of a Radio Access Network (RAN) and a Mobile Core. As shown in Figure 3, the mobile cellular network consists of two main subsystems: the Radio Access ...

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme ...

In this article, an algorithm for automatic control of energy sources was developed to improve the uninterrupted power supply of mobile communication base stations. Based on the proposed ...
