-----

But the integration of more inverter-based resources into the grid presents challenges to grid stability. The good news is that cutting-edge research into grid-forming ...

-- Today, NEMA announced the publication of its Electric Vehicle Supply Equipment (EVSE) Power Export Permitting Standard, defining the technical parameters to ...

The goal of this work is to accelerate the development of interconnection and interoperability requirements to take advantage of ...

The Essential Grid Operations from Solar project is a national laboratory-led research and industry engagement effort that aims to expedite the development and adoption of reliability ...

As the grid begins to rely more heavily on renewables and battery storage, inverter-based resources (IBRs) are gaining an increasingly important place in modern electrical systems.

This handbook outlines the requirements for receiving interconnection approval from NV Energy for the installation of a non-incentivized renewable energy system and/or non-incentivized ...

Some system operators and research and regulatory organizations have already published their versions of technical requirements for GFM capability. This page tracks most recent versions ...

The goal of this work is to accelerate the development of interconnection and interoperability requirements to take advantage of new and emerging distributed energy ...

Due to the infancy of the use of storage and inverter technologies as a grid-integrated operational asset there
