How do I choose a rooftop solar system?

If you're opting for rooftop solar, in addition to the location of your home, you also need adequate roof space depending on your system size. You may need to get approval of your solar setup from your HOA. You also may need to cut back trees to make sure enough sunlight is hitting your panels. Think you might want to try solar panels?

Should you install solar panels on a south-facing roof?

If more neighbors participate in a solar program, it reduces the overall cost of installation for everyone. According to the U.S. Office of Energy Efficiency & Renewable Energy, solar panels work best on south-facing roofs with a slope between 15 and 40 degrees, though other roofs may be suitable. 2. Research installers
