The 146MW Tanahu project isn't your grandpa's pumped storage. Its AI-powered turbines predict rainfall patterns using Himalayan glacier melt data, achieving 89% round-trip efficiency.

Gham Power, in partnership with Practical Action and Swanbarton, has secured a project from UNIDO to install a 4 MWh energy storage system ...

This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy.

Representing Nepal at the launch were Nepali Ambassador Bharat Kumar Regmi, Gham Power CEO Anjal Niraula, and teams from Swanbarton and Practical Action. This ...

Even though Nepal's installed capacity has been expanding, there can be no energy security without having a mix of storage and pumped storage projects together with the ...

With the dominance of hydropower, constituting 95% of Nepal's generation capacity, mostly by run-of-river, energy storage systems (ESS) are vital not only during dry ...

Gham Power together with its partners Practical Action and Swanbarton have officially been awarded a project by United Nations Industrial Development Organization (UNIDO) to install ...

This groundbreaking project will replace polluting diesel generators with a large-scale battery storage system powered by solar energy.

Nepal's mountainous terrain and growing energy demands make 30kW storage systems a game-changer.
