When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest electricity generation site in New Zealand." New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

What is New Zealand's First Utility-scale battery energy storage system?

New Zealand welcomed its first utility-scale battery energy storage system earlier this year. The 35 MW/35 MWh Rotohiko battery facility commenced operation with electricity distribution company WEL Networks in April, after completing testing and commissioning.

Why is Singapore a good place to invest in renewables?

Finally, Singapore has built up a vibrant ecosystem of companies across the value chain ranging from clean energy solution providers, project and legal advisories and financiers that can support the development and execution of renewables projects in the region.

These are some insights on how Singapore can support your ambitions to capture new opportunities in the growing renewable energy ...

Contact Energy has announced that construction will start immediately on what is one of the country's first large-scale battery ...

Construction of the BESS, located south of Whangarei, the northernmost city of New Zealand, began in early 2023 and was ...

A planned 200 MWh solar-plus-storage project in Glorit, near Auckland, on the North Island of New Zealand, has been granted resource consent and a notice of requirement ...
