---

To charge, the battery uses a thermal-energy storage system to cool the CO<sub>2</sub> down to ambient pressure, and a condenser turns it into a liquid over a span of ten hours.

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.

The New York City Economic Development Corporation (NYCEDC) and NYCIDA announced the five BESS projects yesterday (23 April), which will be built by developer ...

If energy storage is like a massive battery, then peaker plants are like a massive gas-powered generator releasing emissions into the air. They are older power plants that are costly to ...

If energy storage is like a massive battery, then peaker plants are like a massive gas-powered generator releasing emissions into the air. They ...

With electricity demands surging due to emerging technologies like artificial intelligence and electric vehicles, and climate-driven heat ...

Houston, TX - August 8, 2024 - Catalyze, a fully integrated developer and Independent Power Producer (IPP) of distributed renewable energy assets, today announced the launch of its first ...

These innovative CO<sub>2</sub> batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

Energy storage developer NineDot has announced the closing of a US\$65 million equipment financing supporting the purchase of up to 100MW/400MWh of batteries for use in ...

With electricity demands surging due to emerging technologies like artificial intelligence and electric vehicles, and climate-driven heat waves intensifying, battery energy ...

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.

Energy storage developer NineDot has announced the closing of a US\$65 million equipment financing supporting the purchase of up to ...
