Harbin Electric has developed and produced 67 impulse hydropower units for 30 power stations worldwide, including the Dongchuan Hydropower Project in China, the Minas ...

Harbin Electric has developed and produced 67 impulse hydropower units for 30 power stations worldwide, including the ...

An impulse generator is an electrical apparatus which produces very short high-voltage or high-current surges. Such devices can be classified into two types: impulse voltage generators and impulse current generators. High impulse voltages are used to test the strength of electric power equipment against lightning and switching surges. Also, steep-front impulse voltages are sometim...

This article explores the principles behind voltage impulse generators, their applications, and a detailed review of the LISUN DO160-S17 Voltage Spike Generator, a ...

Impulse Voltage Generators are designed to generate impulse voltages that simulate lightning strikes and switching surges. The complete test system consists of a charging rectifier, ...

In this article, we'll break down how an impulse voltage generator works, its role in lightning testing, and why it is essential for ...

Harbin Electric celebrated a milestone in China with the fabrication of the world's largest impulse runner.

Under the direction of the project's owner China Datang Corporation, Harbin Electric Machinery Company ("Machinery Company") has independently developed the state-of-the-art ...

This article explores the principles behind voltage impulse generators, their applications, and a detailed review of the LISUN DO160 ...

An impulse generator is an electrical apparatus which produces very short high- voltage or high- current surges. Such devices can be classified into two types: impulse voltage generators and ...

In this article, we'll break down how an impulse voltage generator works, its role in lightning testing, and why it is essential for protecting high voltage infrastructure.

Harbin Electric Corporation announces a massive milestone with the world's largest impulse turbine runner, revolutionizing hydropower technology and efficiency.
