The OPARR parallel relay function of the DualSun SLL solar station makes it possible to control the thermal backup so as not to interfere with the solar energy input.

RPS Solar Pump Kits are for people that believe in getting the job done themselves, and getting it done right. Our goal is to arm you with the ...

In solar power plants, pressure control panels are often used to monitor and regulate the pressure of fluids such as coolant or hydraulic fluids. These panels must have ...

Mastery of the shut-off, pressure relief, and flow control valves can significantly enhance the reliability and efficiency of solar systems. Each valve has distinct operations; ...

Solar pressure limiting valves play an essential role in the efficiency and safety of solar energy systems, functioning as pivotal ...

By integrating a solar controller, users can harness renewable energy to power pressure instrumentation, reducing dependency on fossil fuels and lowering operational costs. This ...

This switch is normally closed, so power can flow from the solar panels to the controller. It opens when the high pressure is reached, cutting power to the system. For both setups, a check ...

The Solar Pump Solution developed by Control Techniques provides not only a cost-effective and scalable solution but will deliver reduced operational costs, improved ...

RPS Solar Pump Kits are for people that believe in getting the job done themselves, and getting it done right. Our goal is to arm you with the equipment and knowledge to take control of your ...

1.1. General safety instructions
1.2. General standards to be observed
2. Definition of a pressurized solar thermal system
A. See Installation, use, maintenance manual DualSun SPRING downloadable from DualSun online library
2.1. Operating principle of a pressurized solar thermal system
2.2.2. DualSun SLL solar station
Hot water storage tank
Tank with fresh water exchange
3.1. Installation of the DualSun SPRING hybrid panel
Sizing
3.2.2. Presentation of a ISWH pool discharge installation
Positions of the ball valves
3.3.5. In which case is it necessary to control the back-up so as not to hamper the operation of the solar installation?
Case 1:
Case 2:
Case 3:
3.3.5.3. Control by DualSun SLL solar controller of a thermodynamic tank with dry contact
Procedure for modifying the system parameter:
Fastening
4.2. Choice of heat transfer fluid
5.1. Rinsing of the ISWH solar and pool discharge circuits
5.3. Filling of the swimming pool discharge solar circuit
Reminder of names:
1.7 L / min = 0.1 m³ / h
6. Guarantees
6.1. Commissioning report
7. General recommendations
Safety of workers
After-sales service and maintenance conditions
Please read this installation manual thoroughly and in detail in order to be able to fully exploit the functionality of the product. DualSun disclaims all liability for defects and damages that would result from non-compliance with the installation instructions (improper use, incorrect installation, handling error, etc.). **IMPORTANT** It is important ...
