Can SeaCo buy a container fleet?

Seaco can purchase an existing container fleet from the owner-user and then lease the containers back on a short-to or longer-term agreement. This helps provide capital to the owning company, and benefit Seaco's services in operating container fleets.

Who owns the containers if the contract expires?

The Lessee becomes the owner of the containers upon expiry of the contract, provided all payment obligations have been fulfilled. The containers provided can be Seaco's own containers, or bespoke containers i.e. containers built to the specifications required by the customer.

Can SeaCo provide a replacement container?

Seaco can arrange for a replacement container upon off-hire as per the terms of the leasing agreement. At the end of the container's lease life, the container is returned to Seaco, who will be responsible for the ongoing management and onward sale of containers. Master Lease is the most flexible lease option available.

Seaco can purchase an existing container fleet from the owner-user and then lease the containers back on a short-to or longer-term agreement. This helps provide capital to the owning ...
