Romania advances energy transition with major battery storage and solar panel manufacturing milestones. Romania's Ministry of ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar ...

HighJoule is providing Romania with green energy solutions, including four 46kW foldable solar systems and five 100kW/215kWh energy storage units, which offer flexible and rapid ...

A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go ...

From Bucharest to Cluj-Napoca, businesses and households alike are discovering how these systems solve the puzzle of intermittent solar/wind power while cutting electricity costs.

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone ...

Our expertise in photovoltaic energy storage systems, BESS solutions, mobile power containers, EMS management systems, commercial storage, industrial storage, and containerized storage ...

Battery Energy Storage Systems represent the missing link in Romania's renewable energy infrastructure.
