You know, Serbia's been wrestling with energy dependency for decades. With 65% of electricity still generated from coal and aging infrastructure causing 7% transmission losses in 2024 ...

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy ...

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil ...

Serbia has taken a bold step toward renewable energy with a newly signed agreement to build 1 GW of self-balancing solar power plants. This groundbreaking project, led ...

This storage system is pivotal for grid stability, storing excess energy generated during sunny peak production times and releasing it ...

With Serbia's energy strategy targeting 3.6 GW of wind and 7.36 GW of solar capacity by 2040, pumped-storage hydropower will be critical for ensuring energy ...

This storage system is pivotal for grid stability, storing excess energy generated during sunny peak production times and releasing it when demand is high or solar generation ...

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

Serbia-based Solar Power Plant Ipsilon plans to install two agrisolar power plants with a capacity of 9.9 MW

each in the municipality of Odzaci. The projects include storing ...

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen facilities, in order to ...

Factors driving the renewable trend in Serbia include EU accession-related requirements for Serbia to decrease thermal power generation and Serbia's commitments ...
