Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system includes solar panels, a lithium iron phosphate ...

All tied to solar panels, diesel generators, or hybrid energy systems, these solar container house solutions can be deployed within hours of arrival at the site, and they give end ...

This basic entry level solar power system will provide lighting for a single shipping container. The lights will be a string of 4 DC LED A bulbs which operate on a timer switch. The system is ...

This package includes two 14-watt vaporproof LED fixtures, one 265-watt solar panel and two 40aH lithium-ion batteries. At a fully charged state, the system can operate for two days (48 ...

Solar energy containers encapsulate cutting-edge technology designed to capture and convert sunlight into usable electricity, particularly in remote or off-grid locations. ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed
