---

Solar photovoltaic (PV) systems in Namibia can generate twice as much electricity as comparable systems in central Europe. Meanwhile average wind speeds in its southern and coastal ...

Upon completion, the power station is expected to make a notable contribution to Namibia's energy mix by increasing the share of ...

The national energy utility of Namibia, NamPower, has broken ground on the Southern African nation's largest solar PV project to date. ...

Despite Namibia's abundant solar resources, the country currently imports over half of its electricity due to limited domestic generation capacity. The new solar projects aim to ...

Namibia has commenced building its largest solar facility, Sores|Gaib, to reduce its reliance on energy imports by utilising its significant solar capability, which is regarded as one ...

Namibia has allocated 330 MW of solar power capacity for procurement, part of its 2024 energy strategy to boost renewable energy, reduce dependence on imports, and create ...

Solar photovoltaic (PV) systems in Namibia can generate twice as much electricity as comparable systems in central Europe. Meanwhile average ...

Namibia has begun construction on the Sores Gaib Solar Power Plant, a 100-MW solar power plant led by NamPower and TotalEnergies. The project will significantly boost the ...

The national energy utility of Namibia, NamPower, has broken ground on the Southern African nation's largest solar PV project to date. The 100MW Sores IGAib Power ...

Amidst growing concerns over power supply disruptions in South Africa, solar power stands out as a reliable solution for bolstering Namibia's energy availability.

Namibia is set to break ground on the construction of the 100 megawatt (MW) Sores-Gaib Power Station. The project, led by the state ...

NamPower starts building the 100 MW Sores Gaib solar park, Namibia's largest, funded by KfW and due online in 2026 to cut imports and CO2 emissions.
