A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ...

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according ...

With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

Whether it's grid-side storage in Germany, capacity market projects in the UK, or solar-plus-storage systems under construction in Southern Europe, the demand for battery ...

SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative aimed at accelerating the business case ...

The SolarPower Europe report shows that battery storage installations in Europe are growing steadily. In 2024, the market achieved a 15% growth, contributing to a broader ...
