Solar panels that served a private subdivision on Davis-Monthan Air Force Base were torn down at the end of their lifespan, officials say.

It was a novel idea at the time, but one that made sense: In 1979, President Jimmy Carter had 32 solar panels installed on the roof of the White House. They were removed just ...

In 1986 when the price of energy was temporarily cheaper and Americans' minds were less focused on environmental issues, President Reagan ordered the panels removed from the ...

President Ronald Reagan removed the solar panels in 1981, reflecting his different energy priorities. President Barack Obama reinstalled solar panels in 2010, which remain on ...

Solar power at the White House was first introduced in 1979. The solar panels were removed in 1986. Solar power was reintroduced early in the 21st century. Mechanical engineer Fred ...

He set an example during his administration by promoting the use of solar energy by installing solar heating panels on the roof of the West Wing in 1979. They were removed in the 1980s.

Carter's solar panels were removed during repairs to the White House roof and were not reinstalled. "Putting them back up would be very unwise, based on cost," Reagan's ...

The White House panels cost \$28,000 to install and were used to heat water, but they were removed during what was described as "roof repairs" and never re-installed, instead ...

President Ronald Reagan removed the solar panels in 1981, reflecting his different energy priorities. President Barack Obama ...

Solar panels were removed
