---

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar ...

While Ireland's energy transition towards renewables is essential for meeting climate targets and legally binding, the rapid growth of solar PV requires grid operators and ...

Ireland has achieved a major milestone in renewable energy, exceeding its 2024 target for solar power generation well ahead of ...

On March 25th, 2025, Ireland reached a new record for grid-scale Solar power, generating over 750 Megawatts (MW) at one point, 18 MW more than the previous peak set in July 2024. This ...

Wind and solar combined made up 40% of Ireland's electricity generation capacity in 2024, with wind power making up the lion's share ...

Ireland has achieved a major milestone in renewable energy, exceeding its 2024 target for solar power generation well ahead of schedule. Energy Minister Eamon Ryan ...

Wind and solar combined made up 40% of Ireland's electricity generation capacity in 2024, with wind power making up the lion's share of 80% of all renewable energy ...

Ireland's solar energy increased by 49% in the last year and by 160% since 2023, new figures show today. Solar Ireland said solar power is now meeting the electricity needs of ...

In March, Ireland's electricity grid hit a new solar power record, with a peak of 750 MW connected to the system. The figure marks a key milestone towards the country's 80% ...

In just two years, Ireland's installed solar capacity has increased by 159.8%. When we launched our first Scale of Solar report in 2023, solar energy in Ireland was still emerging. But today, it's ...

The capital city has become Ireland's solar showcase, with three large-scale solar farms now feeding the national grid. These installations not only reduce fossil fuel dependence ...

Ireland's solar energy increased by 49% in the last year and by 160% since 2023, new figures show today. Solar Ireland said solar ...
