Does solar-estimate have an editorial advisory committee?

Solar-Estimate.org has set up an editorial advisory committee as part of our commitment to the Quality Solar Initiative. Our editorial advisory committee is comprised of full-time Solar-Estimate staff, as well as independent contributors, who are among the most experienced individuals in the solar industry.

How much power does a solar panel produce per square foot?

The more efficient a solar panel is, the more power per square foot. As of 2025, the most popular solar panels have a rated output of 450 watts. To get the most out of your solar energy system, choose panels with at least that much power output. Your solar inverter setup is also an important consideration--make sure it suits your roof's layout.

What is the difference between a solar loan and a PPA?

Private solar loans typically come with higher interest rates or upfront fees. Solar lease or power purchase agreement (PPA): You make monthly payments on your system like a loan, but a third-party company owns your system. You'll either sign a solar lease or purchase the electricity the panels generate through a PPA.
