-----

The session highlighted the critical role of solar power and energy storage in enhancing energy security and supporting Africa's energy transition toward sustainability.

The introduction of this pumped storage system is key in managing the intermittency issues associated with renewable power sources such as wind and solar ...

Taken together, the project has proven an innovative, transformational and scalable pathway, helping to increase the share of clean energy in South Africa's power grid, ...

The development of a major pumped hydro storage project in South Africa has received a major financial boost as the country looks to increase its renewable energy output.

South Africa's energy crisis cannot be solved with generation alone. Without the ability to store and strategically deploy clean energy, ...

South African State-owned power utility Eskom is building a megapower installation in Limpopo.

The introduction of this pumped storage system is key in managing the intermittency issues associated with renewable power ...

Eskom and Agence Fran#231;aise de D#233;veloppement (AFD) have entered a R125 million grant agreement to support the Tubatse Pumped ...

Ingula is the first new pumped storage project in South Africa for over 25 years and the largest of its kind in Africa. The complete electro-mechanical equipment was supplied by Voith.
